~ One ~

One tree can give life to a forest,
Ones smile can start a friendship,
One hand can uplift a soul,
One idea can shape the future,
One candle can wipe out darkness,
One laugh can conquer gloom,
One ray of hope can lift your spirits,
One touch can show that you care,
One life can make a difference,
Be that 'one' today.

We're excited to share our
growing collection of
handcrafted items, each made
with passion and care.
Guided by our love for
creativity, community, and
conservation, we aim to create
meaningful memories and
timeless treasures for you to
enjoy. Whenever possible, we
incorporate reclaimed
materials to promote
sustainability, giving new life
to every piece.

About US

With over 25 years of combined experience in industrial printing and manufacturing, we are proud Wisconsin natives who stay true to our roots.

A Legacy of Craftsmanship

Northern Roots Creations draws from a rich heritage of craftsmanship. Our story is intertwined with the skills passed down from generations, particularly our fathers, passionate craftsmen who specialized in working with steel. Their dedication to precision, creativity, and hard work became the cornerstone of our company ethos.

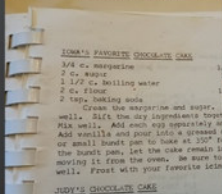

Northern Roots Creations has expanded beyond traditional metalwork to embrace innovative techniques like 3D printing and laser engraving.

These cutting-edge tools allow us to create intricate designs on a variety of materials, including glass and metal, which have become the hallmark of our business.

While we honor the traditions of hand craftsmanship, we've also embraced technology to push the boundaries of what's possible.

HERITAGE

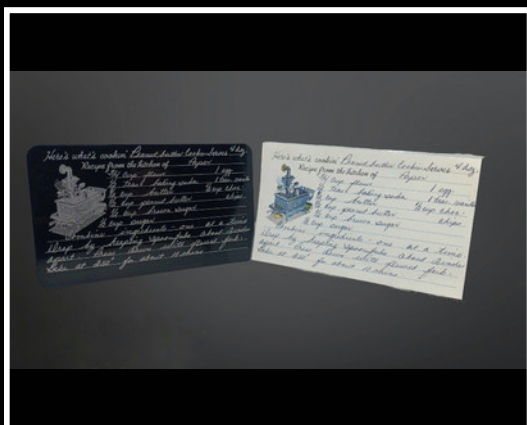

Laser Engraving

Laser engraving is a fascinating blend of precision and creativity, where technology meets artistry to bring intricate designs to life. Using a focused beam of light, the laser delicately etches patterns, text, or images onto various surfaces, transforming ordinary materials like glass, metal, or wood into personalized works of art.

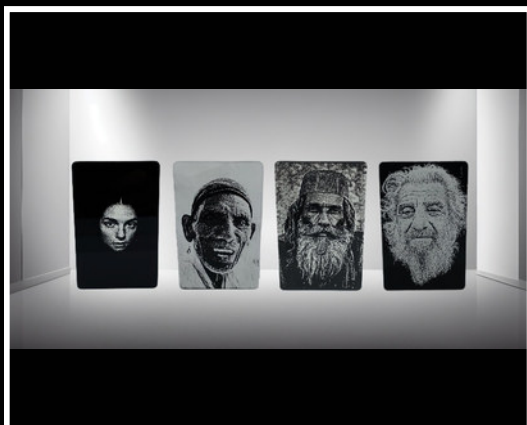

Each engraving is a permanent mark, rich in detail and texture, capturing the essence of craftsmanship with the clean precision that only a laser can achieve.

Whether it's a simple monogram or an elaborate design, laser engraving offers limitless possibilities for artistic expression, where the final piece reflects both skill and imagination.

Signature Series

Our Signature Series Memorial products are thoughtfully crafted to honor and celebrate the lives of loved ones. Each piece is designed with care, using high-quality materials and intricate engraving techniques that capture the essence of cherished memories. From custom metal or glass engravings to personalized 3D designs, these memorials are tailored to reflect the individuality and legacy of those who have passed. With a focus on durability and beauty, our memorial products offer a timeless way to preserve precious moments, creating heartfelt keepsakes that bring comfort and remembrance to families.

Emergency Contact Cards

Accidents can happen anytime, anywhere, and having a durable emergency contact card in your wallet can be a lifesaver. If your phone is lost or damaged, first responders often check wallets or purses for critical information. Our emergency contact cards are made from metal—not paper or plastic—making them fire-resistant and weatherproof. This ensures your vital details are accessible even in extreme conditions. Whether it's your health information, contacts, or instructions for your pets, these metal cards provide a reliable way to help rescuers act quickly. In situations where you're unable to speak, this sturdy card ensures both your safety and that of your pets, who might otherwise be left unattended for days. It's a small investment with the potential to make a life-saving difference.

Pet option available

Additional Capabilities

Film and Slide scanning

Restoration from film, slide or photo converted to digital format for re-printing or engraving.

Additional Notices

A laser-engraved photograph will look different from a traditional printed photo because the laser engraving process is inherently subtractive, while traditional photo printing is additive.

Laser engraving uses a focused laser beam to burn, etch, or vaporize material from the surface, creating contrast by removing parts of the surface rather than adding color. This process creates a textured, high-contrast image, often in gray-scale or monochrome, without the fine color gradients you'd see in a photo. Due to the laser's heat, the engraved areas are slightly recessed and tactile, creating a durable, permanent design that cannot be easily removed or faded.

In contrast, a traditional photograph is created by applying inks or pigments to paper or another material. This additive process layers colors, allowing for smooth gradients, fine details, and vibrant hues. Printed photos can capture detailed, lifelike images because the ink provides the full spectrum of colors and shading, whereas laser engraving is limited by the color and contrast of the base material.

In summary, a laser-engraved photograph will appear more stylized and high-contrast with a textured feel, while a traditional photo maintains color, detail, and smooth gradients through an ink application process. The engraved image is durable and permanent, while the printed image is more delicate but visually detailed.

3d Printing

**Imagine.
Dream.
Create.**

3d printing revolutionizes manufacturing by allowing the creation of intricate objects layer by layer, offering unprecedented customization and design flexibility.

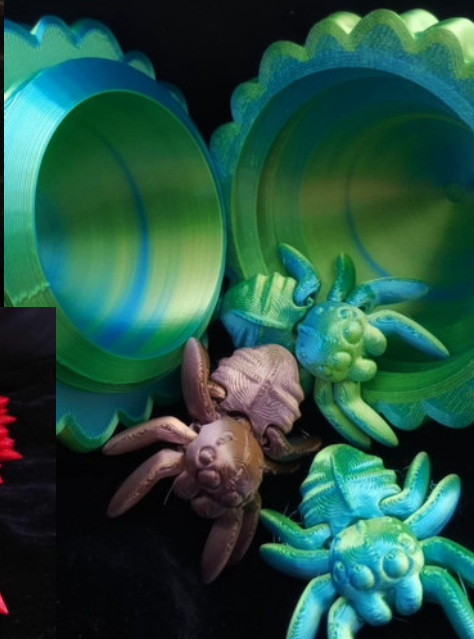

Polylactic Acid (PLA) filament is a recyclable, natural thermoplastic polyester that is derived from renewable resources such as corn starch or sugar cane.

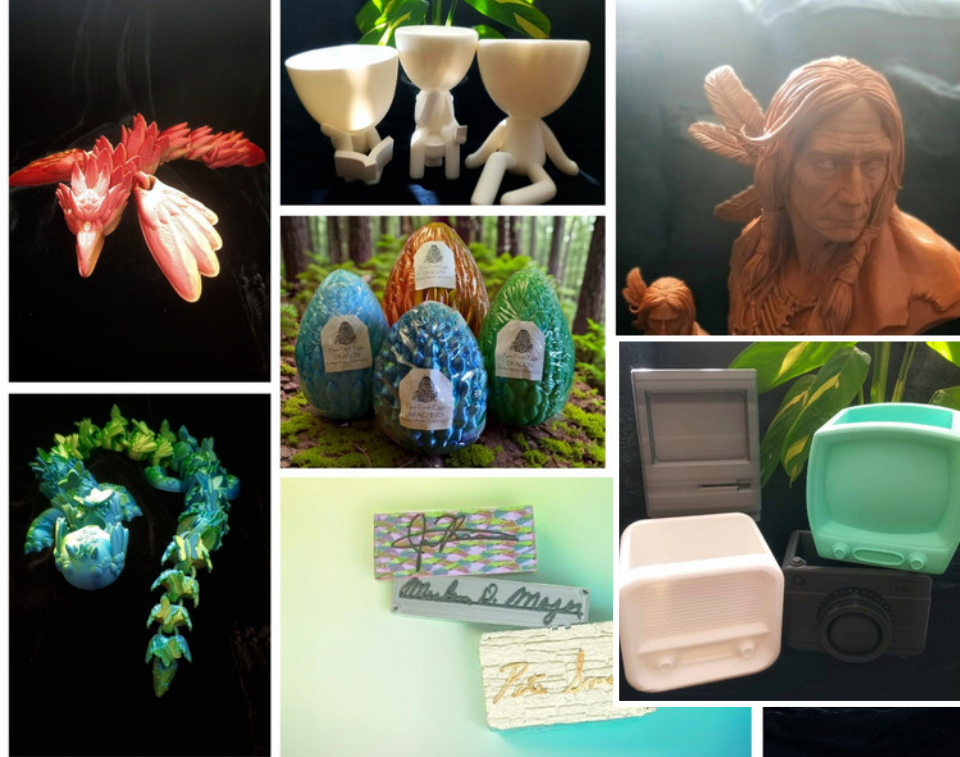

The filament is biodegradable under certain conditions with high heat capacity and high mechanical strength.

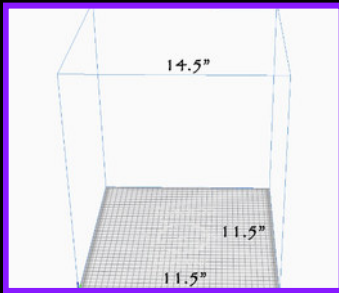

Crafting for the Modern World

We combine traditional craftsmanship with modern tools like 3D printers and laser engravers, which enable us to create intricate designs that were once impossible by hand. This blend of old and new allows us to offer a wide range of custom products, from home décor to corporate gifts, each imbued with the spirit of innovation and sustainability.

DESCRIPTION	QTY	PRICE	TOTAL
Car Bedroom Mattress - Human Size	1	\$450	\$450
Setup	1	\$100	\$100

Estimate Example

At Northern Roots Creations LLC, we offer 3D print estimating upon request. If a project falls beyond our capabilities, we'll gladly connect you with trusted partners who can bring your vision to life.

To minimize waste and promote sustainability, we primarily use single-color or multi-part 3D printing methods. This approach helps reduce the significant material waste often associated with multi-color 3D printing, aligning with our commitment to eco-friendly practices.

Key-chains

Event giveaways (conferences, trade shows)

Bridal party or wedding favors

Souvenirs (tourist spots or special events)

Promotional items (for businesses or brands)

Holiday ornaments (if designed with a festive touch)

Gift bag add-ons (for birthdays or special occasions)

School or team spirit tokens (for students, athletes, or alumni)

Thank you gifts (for clients or customers)

Token rewards (for kids or as prizes)

Our key-chains are not just functional for holding keys, but they also make stylish additions to anything with a zipper or ring—such as backpacks, luggage, lunch bags, purses, tent zippers, coolers, and even ceiling fan pull cords.

Looking to the Future

As we look to the future, Northern Roots Creations will continue to grow and evolve, driven by the same core values that have shaped our journey so far. We are excited to keep exploring new ways to re-purpose materials, pushing the boundaries of 3D printing and laser engraving, and expanding our range of custom products.

At our core, Northern Roots Creations is about more than just making things—it's about making a positive impact. We're proud to be part of a movement that values sustainability and craftsmanship, and we can't wait to see where our journey takes us next.

In a world where mass production often overshadows individuality, Northern Roots Creations is dedicated to offering something different: handmade, custom-crafted pieces that are as unique as the people who inspire them. Our northern roots run deep, and our passion for creating with purpose is stronger than ever.

Coming Soon

NRC Designs

While we do print prefabricated 3D files available to anyone, here are a few of our exclusive in-house designs we've been developing. We're proud of our work and excited to continue creating, refining, and quality testing new models.

As we continue to grow,
we'll keep designing
innovative new 3D
models
